Interactive Technologies Inc. Appoints E&P Marine Inc. as Exclusive Global Sales Representative for Marine, RV, and Powersports Markets

Partnership to accelerate global expansion and introduce next-generation wireless switching solutions, including the Pi Switch™

MIAMI, FL / KANSAS, USA — Interactive Technologies Inc. (ITI), a leading innovator in wireless switching and control solutions, has appointed E&P Marine Inc. as its exclusive global manufacturers' representative for the marine, RV, and powersports industries.

Through this strategic partnership, E&P Marine will lead sales, distribution, and market development for ITI's full product portfolio across the United States and international markets, including North and South America and beyond. The collaboration is designed to accelerate ITI's global expansion while delivering advanced, installation-friendly technologies to OEM and aftermarket partners worldwide.

E&P Marine Inc. is widely recognized for representing leading brands across the marine, RV, and powersports sectors, with a strong international presence and extensive distribution network. By leveraging its deep industry expertise and established relationships, E&P Marine will play a key role in expanding ITI's market reach and supporting continued growth.

"Partnering with E&P Marine is a strategic step forward for Interactive Technologies," said Ron Dorrell, President & CEO of ITI. "Their global reach, industry knowledge, and strong customer relationships make them an ideal representative as we continue to expand our IP67-rated solutions—delivering a hybrid approach that combines the reliability of analog switching with the intelligence and flexibility of digital control."

The partnership will highlight ITI's innovative product lineup, including its flagship **Pi Switch™ (patent pending)**—a next-generation wireless smart switch engineered for durability and ease of installation. Key features include a 32-bit ARM processor, IP67-rated waterproof design, dual 10A outputs, wireless BLE connectivity, and Smart FET protection technology. Designed to replace traditional hardwired systems, the Pi Switch™ simplifies installation, reduces wiring complexity, and enhances overall system reliability.

ITI will introduce to the industry SyRF + BLE — The new standard for connected marine systems. SyRF+ is our proprietary implementation of IEEE 802.15.4—delivering long-range, encrypted, two-way communication with intelligent channel agility and ultra-efficient overhead. The result is a secure, interference-resistant wireless link engineered to outperform wired-level reliability in the most demanding environments. Now integrated with Bluetooth Low Energy (BLE) for smartphone access, monitoring, and updates, it delivers both uncompromising performance and everyday convenience."

Together, ITI and E&P Marine aim to modernize electrical systems across marine, RV, and powersports applications by reducing installation time, improving performance, and delivering scalable, forward-thinking solutions for today's evolving market demands.

About Interactive Technologies Inc.

Founded in 1998 and headquartered in Kansas, Interactive Technologies Inc. (ITI) specializes in the design and manufacturing of advanced wireless switching and control solutions. With decades of experience in the marine, RV, powersports, and industrial markets, ITI is committed to delivering reliable, high-performance technologies that simplify electrical systems and meet the evolving needs of OEM and aftermarket partners worldwide.
