YACHTS

MIAMI / MAY 2026 / FOR IMMEDIATE RELEASE

Powerboats USA appointed official Manari Yachts dealer in the United States

Manari Yachts has appointed **Powerboats USA** as its official dealer in the United States, strengthening the brand's presence in one of the world's most dynamic yachting markets.

Based in Miami, **Powerboats** has built a strong reputation in the superyacht industry for supplying premium chase boats and tenders to world-renowned megayachts, including Breakthrough, AHPO, and various Benetti owners. The company has extensive experience in the South Florida market and offers sales, brokerage and ownership support tailored to both first-time buyers and experienced yacht owners.

The partnership marks an important step for Manari Yachts following the successful world debut and sea trials of the Manari 52 earlier this year in Miami. The Miami-based yacht brand focuses on combining advanced naval engineering with refined contemporary design. Developed in collaboration with leading industry partners, its first model, the Manari 52, was created to deliver both performance and long-range cruising capability in a highly sophisticated package with Loro Piana materials playing a leading role in the interior.

Through Powerboats USA, clients across the United States will now have direct access to the Manari range, supported by local expertise and a strong presence in the Florida boating community.

Powerboats USA will represent Manari Yachts from its Miami base, introducing the brand to American owners seeking a modern approach to luxury yachting — where engineering, comfort and understated design come together without compromise.
