THE UK WITH PME GROUP FOR
MARINE GENERATORS**

PRESS RELEASE

NANNI REINFORCES ITS PRESENCE IN THE UK WITH PME GROUP FOR MARINE GENERATORS

Nanni is pleased to announce a new partnership with PME Power Systems Group, further strengthening its presence in the United Kingdom and supporting the development of its generator set business across the region.

PME Group has been a trusted representative of MAN engines in the UK for many years and has established a strong reputation in the marine industry for delivering high-quality propulsion solutions and technical support. Through this new agreement, PME Group will become a key distributor for the complete Nanni generator set range in the UK market.

The partnership is part of Nanni's strategy to expand the visibility and adoption of its generator solutions across the yachting, commercial marine and naval sectors. With a comprehensive range of marine generator sets from 5 kW to 930 kW, Nanni offers reliable and efficient power solutions tailored to the needs of a wide variety of vessels and marine applications.

This collaboration will allow each customer to benefit from a complete propulsion and onboard power package. By combining MAN propulsion engines, already distributed and supported by PME Group throughout the UK, with Nanni generator sets, customers will have access to an integrated solution from a single trusted partner.

The partnership reflects both companies' commitment to providing innovative, high-performance marine solutions while strengthening local support and service capabilities throughout the UK market.

Nanni and PME Group look forward to supporting the evolving needs of the UK marine industry and delivering reliable power solutions for the next generation of yachting, commercial and naval projects.

About Nanni

Founded in 1952, Nanni is a leading manufacturer of marine engines and generator sets, renowned for its expertise in marinization and complete marine power solutions. Its robust, reliable and user-friendly products are distributed worldwide through an extensive network of partners.

With one production plant in France and one in Italy, Nanni offers a complete range of marine engines from 10 to 2,200 horsepower and marine generators from 5 to 930 kW covering all applications from light pleasure craft to superyachts and even the most demanding professional vessels.

About PME Group

PME Power Systems Group Ltd is the UK and Ireland importer for MAN marine engines and spare parts, supplying advanced propulsion and power solutions to the marine industry.

They are a specialist engineering company working with leading manufacturers including MAN Engines and Aventics to provide reliable products, genuine parts and expert technical support across the UK and Ireland.

With decades of experience supporting commercial, leisure and specialist vessels, PME Group offers a complete service covering engine supply, auxiliary power, parts distribution, servicing support and technical consultancy. Their team works closely with boat builders, operators, service companies, and dealers to ensure dependable performance in demanding marine environments.

Alongside their own engineering and parts teams, PME Group works with a trusted network of authorised dealers located throughout the UK and Ireland, allowing them to provide local support, installation and servicing wherever their customers operate.

As the official MAN marine importer, PME Group provides access to high-performance diesel and hybrid propulsion systems known for efficiency, durability and innovation. They also support customers with compliant, environmentally responsible solutions designed to meet current IMO emissions regulations and future requirements.

manmi

In addition to propulsion systems, PME Group supplies auxiliary generators, control equipment and engineering support products, allowing them to provide complete power solutions from a single source.

Headquartered in Plymouth with a second office in Poole, PME Group supports customers throughout the UK and Ireland, combining technical knowledge with practical experience to deliver trusted engineering support where reliability matters most.
