

## Sealegs Names LC8 Marine Authorized Sales Representative for U.S. East Coast

### FOR IMMEDIATE RELEASE

**Plymouth, MA – June 4<sup>th</sup>, 2026** - Sealegs International has appointed LC8 Marine as its authorized sales representative for the Eastern Seaboard of the United States, with Scott Dyer and the LC8 Marine team now supporting customers across the East Coast with sales guidance, demonstrations, and expertise across the Sealegs amphibious boat range.

Jack Ewen, Global Sales Director at Sealegs International, welcomed the appointment, saying, “Scott Dyer and the LC8 team bring exactly the right combination of marine industry expertise, coastal market knowledge, and genuine passion for the Sealegs product. I have no doubt they’ll do an outstanding job representing the brand across the Eastern Seaboard.

For our East Coast customers, this appointment means having a dedicated local team to guide them through the range, arrange demonstrations, and support them throughout the purchase process. We’re incredibly proud to have LC8 Marine representing Sealegs in this market.”

Sealegs has built a strong global reputation for innovation, quality, and practical amphibious technology, offering coastal boat owners a uniquely convenient way to transition seamlessly from land to water and enjoy greater freedom on the coast. Scott Dyer of LC8 Marine said, “We’re incredibly excited to represent Sealegs as the authorized sales contact for the Eastern Seaboard. What really stands out to us is the quality behind the product. These boats are exceptionally well engineered, thoughtfully designed, and built for real-world coastal conditions.”

Known worldwide for pioneering amphibious recreational boats, Sealegs allows owners to deploy integrated wheels at the touch of a button and drive directly from land into the water, without the need for a trailer, marina ramp, or separate launching equipment.

### ABOUT SEALEGS

Founded in Auckland, New Zealand, in 2004, Sealegs Boats is the global leader in amphibious marine craft, delivering patented technology that allows boats to seamlessly transition from land to water at the push of a button. With more than 1,850 craft in service across over 55 countries, Sealegs’ innovative designs are used for recreation, tourism, rescue, and commercial operations, offering up to four times the usage of conventional boats by removing the need for trailers, boat ramps, and tidal waits.
