

Revolution Marine Group Names Yacht Sales International Exclusive Dealer for the U.S. and Caribbean

July 8, 2026

- S60 Revolution Edition power catamaran available now in Fort Lauderdale for sea trials and immediate delivery
- S60e Revolution Edition electric model arriving to the U.S. by the end of 2026

Fort Lauderdale, FL — Revolution Marine Group (RMG) and Yacht Sales International (YSI) announced an exclusive dealer agreement naming YSI the Exclusive U.S. & Caribbean Dealer for the Oceanwalker S60 and S60e power catamarans. An S60 Revolution Edition is already in Fort Lauderdale and available for immediate sea trials and delivery — the first Oceanwalker available for purchase in the Western Hemisphere.

Revolution Marine Group was founded on the principle that compromise is not acceptable. Every hull in the Oceanwalker line is developed through intensive collaboration between Revolution's engineering team, designers, and the shipyard — with Revolution's engineers on-site overseeing every stage of construction. The result is a 60-foot power catamaran that delivers the interior volume of a 70-plus-foot monohull, a 27.5-foot best-in-class beam, a 500-square-foot flybridge, and CE Category A ocean certification for bluewater passages. More than 8.5 kWp of solar is standard, backed by a 120 kWh LFP battery bank for extended off-grid operation at anchor. Major systems throughout — Cummins or Volvo Penta power, Garmin, Victron, Kohler, and Miele — carry established U.S. dealer and service networks.

YSI has served as the exclusive U.S. dealer for Greenline Yachts since 2017 — a hybrid and electric pioneer with more than 1,500 boats on the water worldwide. Across its offices in Fort Lauderdale, Palm Beach, Cape Coral, Annapolis, and Chicago, YSI has delivered approximately 100 yachts, the vast majority hybrid, including the first two all-electric Greenlines delivered in the United States (the Greenline 39 and 40). The addition of the Oceanwalker line extends YSI’s established position in hybrid and electric propulsion into the offshore power catamaran segment.

“Revolution Marine Group has engineered something our clients have been asking for for years — a 60-foot offshore catamaran with serious bluewater credentials, best-in-class interior volume, and the infrastructure to run fully off-grid at anchor. The solar integration is not a marketing feature; it is a properly sized system that changes how you use the boat. Having a hull in Fort Lauderdale right now means buyers can get on the water and experience it directly. That is how we sell boats,” said Udo Willersinn, Co-Founder & Employing Broker, Yacht Sales International.

The S60 Revolution Edition currently docked in Fort Lauderdale is available for private sea trials by appointment. The S60e Revolution Edition — the electric-drive

configuration offering near-silent operation and long-range cruising — is scheduled to arrive in Fort Lauderdale by the end of 2026. Additional hull positions for 2026 and 2027 delivery are available for buyers who wish to select their own color, interior finish, and equipment configuration.

“Yacht Sales International brings exactly the expertise and market reach that Oceanwalker needs in the Americas. Their track record with hybrid and electric platforms, their national office network, and the hands-on way they work with buyers through the full ownership journey made this an easy decision. Having a hull in Fort Lauderdale immediately means buyers do not have to take our word for it — they can come and see it,” commented Darren Henn, Brand Ambassador for Revolution Marine Group.

About Revolution Marine Group
