

PRESS RELEASE - FOR IMMEDIATE RELEASE

Tuesday 25th August

32 startups and scaleups confirmed for 2026 Monaco Smart & Sustainable Marina Rendezvous

Thirty Two startups and scaleups have been confirmed to take part in the 6th edition of the Monaco Smart & Sustainable Marina Rendezvous, bringing together an international lineup of companies developing solutions for the future of marinas and waterfront infrastructure.

Taking place at the Yacht Club de Monaco on 20–21 September 2026 with the support of the partners MB92 Group, Airport Authority Hong Kong, ESA Nano Tech, Fondation Prince Albert II de Monaco, Italian Yacht Masters, Bombardier, and Plus Marine, the event will connect startups with investors, marina operators, architects, developers, corporates and other industry decision-makers looking for technologies that can help create smarter, more sustainable and efficient marinas.

The participating companies span everything from pre-seed startups and early-stage businesses to established scaleups, reflecting the range of innovation currently emerging across the marina ecosystem.

Solutions represented across the programme include smart marina infrastructure and digitalisation, energy management and electrification, water technologies, environmental monitoring, sustainable materials, mobility, automation and new services designed to improve marina operations and the user experience.

Pre-revenue

Six companies at the beginning of their commercial journey will take part in this year's programme, developing and validating new solutions as they prepare for wider market adoption:

- BioBright
- HapySity
- Hybrid Solar Systems
- Kolbev
- Lika Digital
- Syndico

Post-revenue

Thirteen within this year's lineup are companies moving beyond initial development and beginning to demonstrate market traction through pilots, early customers and revenue:

- ARKHAUS

- Blue Parameters
- BoatSpace
- GO BRIDGE THE GAP
- HYDRO-K Détection
- Marinapy
- Mediterranean Algae
- Myceen
- One Concept Marine
- OPTI'SEA
- Parastruct
- SMBL
- The Warming Surfaces Company

Scaling revenue

Another thirteen of the participating businesses are already scaling revenues or operating as more established companies, bringing proven solutions and commercial experience to the programme:

- ARIDDITIVE
- Bluet Floating Solutions
- Effetto Venturi
- Metarina
- Metpow
- NAUTICSPOT
- Nemo's Garden
- Plus Marine
- SAMMY
- Seares
- Sync Neural Genesis
- The Searial Cleaners
- URBANTHINK BY K-LC

Ahead of Monaco, participating companies will take part in online jury sessions in early September, presenting their businesses to an international panel of venture capital, angel and corporate investors.

The three highest-scoring startups will then be invited to pitch live at the Yacht Club de Monaco during the event, putting their solutions in front of an audience of investors and key decision-makers from across the marina industry.

Gabbi Richardson, Founder of Yachting Ventures, said:

"What's particularly exciting about this year's lineup is the variety of companies taking part. We have founders at very different stages of their journey, but they're all tackling challenges that will shape how marinas are designed, operated and experienced in the future.

"The value of bringing them together in Monaco is the opportunity to put these solutions directly in front of the people who can help take them into the industry, whether that's through investment, pilot projects, commercial partnerships or introductions."

Mr. Jose Marco Casellini, CEO of M3 Monaco, added:

"Over six years, this event has become a global catalyst for change. We don't speak about sustainability in abstract terms, we drive the partnerships and technology transfers that turn sustainable marinas into an operational reality."

The Monaco Smart & Sustainable Marina Rendezvous has become a leading international meeting point for innovation within marina development, bringing together around 250 professionals from across the global ecosystem.

Alongside the startup programme and Innovation Awards, the two-day event will include conferences, roundtable discussions, workshops, networking sessions and an exhibition area showcasing solutions from across the industry.
